

Application Usage Report

This report describes how often and how heavily the 1 most popular applications were used.

Maximum Number of Concurrent Sessions vs. Time

Most Frequently Used Applications

Of the selected applications, the following table lists those that were accessed by users most often. This is measured by the total number of connections to an application.

Application	Total Number of Sessions	Maximum Number of Concurrent Sessions
MT VOTES	26260	186

Most Heavily Used Applications

Of the selected applications, the following table lists those that were accessed by most users simultaneously. This is measured by the maximum number of concurrent sessions for an application.

	Total Number of	Maximum Number of
--	-----------------	-------------------

Application	Sessions	Concurrent Sessions
MT VOTES	26260	186

Unused Applications

There were no unused applications during the specified time period

Report Parameters

Farm:	<i>Prod-SOS-HLN</i>
Start time:	<i>8/8/2006 08:34 AM</i>
End time:	<i>11/8/2006 08:34 AM</i>
Database update time:	<i>11/8/2006 03:00 AM</i>
Number of applications to display:	<i>1</i>
Selected applications or folders:	<i>Applications/SOS/MT VOTES</i>

Notes:

Data is displayed for the published MetaFrame applications that you selected but not for any Resource Manager applications or published content. For more information on Resource Manager applications, see your Resource Manager documentation.

Number of applications to display: This is the number of applications that was specified on the Define Report Details page of the report generation wizard. However, this number may exceed the number of applications that exist in the farm or that meet the report selection criteria, in which case this report will contain data for fewer applications
